Our Services

Customised Software Development

Software is the tool to access business operations smoothly and increase the efficiency. The customization of software is now very easy to do with our services. We have experience in software development from scratch to end in multiple domains using agile methodology. Our experience with versatile domain will surely add value in your software development.

Web App Development

Our expertise and insights into creating web application development out of nowhere allows us to make very consequential personal impressions, as well as large complex sites that achieve multiple things all at once

Mobile App Development

Shine Infosoftware has enormous experience in mobile app development using latest technologies like React native, Flutter, Android, IOS & Xamarin in versatile domains.

Staff Augmentation

Staff augmentation is latest trending business vertical of IT service agencies after pandemic. Staff augmentation service of Shine Infosoftware is very distinctive and value addition service. This would effectively reduce the cost of the project as well help to fasten the delivery.

Shine Infosoftware has strong hiring and selection process. Therefore, your search for the expert in product development will surely end upon connecting with Shine Infosoftware.

UI/UX Design

All our UI/UX designer's scope and analyze the market continues to establish and discovering knowledge that is to be applied to fully realizing everything that needs to be done to achieve the best results.

Best Cloud App

The Shine Infosoftware team, having expertise in cloud computing technology like Microsoft Azure, Amazon Web Services and Google Cloud Platform.

FinoviaAI

AI-powered financial insights, forecasting, real-time news, analytics, dashboards, and seamless UX.

FINOVIA

| Case Study

Finovia AI empowers financial professionals, businesses, and investors with real-time, data-driven insights through a seamless, intelligent platform. By combining cutting-edge AI with predictive analytics, Finovia transforms how financial decisions are made.

| Features

- AI Forecasting – Predict revenue, trends, and finances with smart ML models.
- Real-Time News & Sentiment – Instantly track market-moving news and sentiment shifts.
- Custom Dashboards – Visualize KPIs and insights in real time with fully flexible dashboards.
- Deep Analytics – Detect patterns and anomalies using advanced AI-powered analytics.
- Unified Data View – Merge data from APIs, CRMs, ERPs, and reports into one platform.
- Smart Alerts & Recommendations – Get AI-driven insights and timely alerts for better decisions.
- Seamless UX – Intuitive design with easy navigation for all users.
- Scenario Modeling – Test financial strategies and predict outcomes with confidence.
- Predictive Risk Detection – Spot potential financial threats before they impact your business.
- Automated Reporting – Generate detailed, professional reports in seconds—no manual effort.

National Bond

National Bonds and UAQ FTZA Join Forces to Empower 9,000 Entities with Pension Solutions in the UAE

| Case Study

The National Bonds save-tastic experience is now on the go. Our new app allows you to tap into the world of your saving anytime, anywhere, so your journey isn't just seamless, it's also convenient.

| Features

- Manage your account and keep track of profit, bonuses, and prizes
- A financial planner is your partner through this journey and will work with you to achieve your goals.
- The first step in this process is to understand responsibilities, plan accordingly and agree on how decisions will be made throughout the term of the partnership.
- In order to reach your goals and achieve your personal ambitions, you need to know where you are today and where you want to be in the future.
- You need to have a starting point and an ending point, the time frame and an estimated dirham cost.
- Analysis and evaluation are keys to any successful financial plan.
- Based on your goals, we go step-by-step through a plan to help you understand each financial recommendation in order to make a clear decision.
- Once these recommendations have been implemented, we will be your coach to coordinate with other trusted professionals such as: accountants, stockbrokers, attorneys, notaries or trust managers.

LESS MEETING

Use Less Meeting to refocus your meetings.

| Case Study

Real-time collaboration and keyboard shortcuts allow your team to instantly capture and share important meeting minutes, actions, and decisions. Instantly share all your meeting minutes the second the meeting ends. Don't bother trying to translate chicken scratch ever again.

| Features

- It can be difficult keeping track of everything you have to do, let alone the people you work with. Users are twice as likely to get to-do's done and on time with Less Meeting.
- Set agendas and simplify meeting minutes for an average of 18% less time spent in meetings. Why stay late when you can add time back to your day?
- Tired of sending several emails to see if to-do's are getting done?
- Automated reminders allow users to assign and check off action items so that you aren't stuck finding out whether anything is getting done.
- Create agendas using our Outlook plugin, Google Apps and iCal template that automatically syncs with Less Meeting.
- Automatically sync tasks with your favorite to-do program.
- Create a task in Less Meeting & check off the task in your to-do app later.
- Easily Sync With Outlook, Google Apps & iOS Devices
